

## Department of the Army, DoD

## § 634.36

### § 634.35 Chemical testing policies and procedures.

(a) *Validity of chemical testing.* Results of chemical testing are valid under this part only under the following circumstances:

(1) Blood, urine, or other bodily substances are tested using generally accepted scientific and medical methods and standards.

(2) Breath tests are administered by qualified personnel (§ 634.33).

(3) An evidential breath-testing device approved by the State or host nation is used. For Army, Air Force, and Marine Corps, the device must also be listed on the NHTSA conforming products list published in the “Conforming Products List for instruments that conform to the Model Specification for Evidential Breath Testing Devices (58 FR 48705), and amendments.”

(4) Procedures established by the State or host nation or as prescribed in paragraph (b) of this section are followed.

(b) *Breath-testing device operational procedures.* If the State or host nation has not established procedures for use of breath-testing devices, the following procedures will apply:

(1) Screening breath-testing devices will be used—

(i) During the initial traffic stop as a field sobriety testing technique, along with other field sobriety testing techniques, to determine if further testing is needed on an evidential breath-testing device.

(ii) According to manufacture operating instructions. (For Army, Air Force and Marine Corps, the screening breath-testing device must also be listed on the NHTSA conforming products list published in the “Model Specifications for Evidential Breath Testers” (September 17, 1993, 58 FR 48705).

(2) Evidential breath-testing devices will be used as follows:

(i) Observe the person to be tested for at least 15 minutes before collecting the breath specimen. During this time, the person must not drink alcoholic beverages or other fluids, eat, smoke, chew tobacco, or ingest any substance.

(ii) Verify calibration and proper operation of the instrument by using a control sample immediately before the test.

(iii) Comply with operational procedures in the manufacturer’s current instruction manual.

(iv) Perform preventive maintenance as required by the instruction manual.

(c) *Chemical tests of personnel involved in fatal accidents.* (1) Installation medical authorities will immediately notify the installation law enforcement officer of—

(i) The death of any person involved in a motor vehicle accident.

(ii) The circumstances surrounding such an accident, based on information available at the time of admission or receipt of the body of the victim.

(2) Medical authorities will examine the bodies of those persons killed in a motor vehicle accident to include drivers, passengers, and pedestrians subject to military jurisdiction. They will also examine the bodies of dependents, who are 16 years of age or older, if the sponsors give their consent. Tests for the presence and concentration of alcohol or other drugs in the person’s blood, bodily fluids, or tissues will be made as soon as possible and where practical within 8 hours of death. The test results will be included in the medical reports.

(3) As provided by law and medical conditions permitting, a blood or breath sample will be obtained from any surviving operator whose vehicle is involved in a fatal accident.

### § 634.36 Detection, apprehension, and testing of intoxicated drivers.

(a) Law enforcement personnel usually detect drivers under the influence of alcohol or other drugs by observing unusual or abnormal driving behavior. Drivers showing such behavior will be stopped immediately. The cause of the unusual driving behavior will be determined, and proper enforcement action will be taken.

(b) When a law enforcement officer reasonably concludes that the individual driving or in control of the vehicle is impaired, field sobriety tests should be conducted on the individual. The DD Form 1920 may be used by law enforcement agencies in examining, interpreting, and recording results of such tests. Law enforcement personnel should use a standard field sobriety test (such as one-leg stand or walk and

## § 634.37

turn) horizontal gaze nystagmus tests as sanctioned by the National Highway Traffic and Safety Administration, and screening breath-testing devices to conduct field sobriety tests.

### **§ 634.37 Voluntary breath and bodily fluid testing based on implied consent.**

(a) Implied consent policy is explained in § 634.8.

(b) Tests may be administered only if the following conditions are met:

(1) The person was lawfully stopped while driving, operating, or in actual physical control of a motor vehicle on the installation.

(2) Reasonable suspicion exists to believe that the person was driving under the influence of alcohol or drugs.

(3) A request was made to the person to consent to the tests combined with a warning that failure to voluntarily submit to or complete a chemical test of bodily fluids or breath will result in the revocation of driving privileges.

(c) As stated in paragraphs (a) and (b) of this section, the law enforcement official relying on implied consent will warn the person that driving privileges will be revoked if the person fails to voluntarily submit to or complete a requested chemical test. The person does not have the right to have an attorney present before stating whether he or she will submit to a test, or during the actual test. Installation commanders will prescribe the type or types of chemical tests to be used. Testing will follow policies and procedures in § 634.35. The results of chemical tests conducted under the implied consent provisions of this part may be used as evidence in courts-martial, nonjudicial proceedings under Article 15 of the UCMJ, administrative actions, and civilian courts.

(d) Special rules exist for persons who have hemophilia, other blood-clotting disorders, or any medical or surgical disorder being treated with an anticoagulant. These persons—

(1) May refuse a blood extraction test without penalty.

(2) Will not be administered a blood extraction test to determine alcohol or other drug concentration or presence under this part.

## 32 CFR Ch. V (7–1–09 Edition)

(3) May be given breath or urine tests, or both.

(e) If a person suspected of intoxicated driving refuses to submit to a chemical test, a test will not be administered except as specified in § 634.38.

### **§ 634.38 Involuntary extraction of bodily fluids in traffic cases.**

(a) *General.* The procedures outlined in this section pertain only to the investigation of individuals stopped, apprehended, or cited on a military installation for any offense related to driving a motor vehicle and for whom probable cause exists to believe that such individual is intoxicated. Extractions of body fluids in furtherance of other kinds of investigations are governed by the Manual for Courts-Martial, United States, Military Rule of Evidence 315 (2002) (MRE 315), and regulatory rules concerning requesting and granting authorizations for searches.

(1) Air Force policy on nonconsensual extraction of blood samples is addressed in AFI 44–102.

(2) Army and Marine Corps personnel should not undertake the nonconsensual extraction of body fluids for reasons other than a valid medical purpose without first obtaining the advice and concurrence of the installation staff judge advocate or his or her designee.

(3) DLA policy on nonconsensual taking of blood samples is contained in DLAR 5700.7.

(b) *Rule.* Involuntary bodily fluid extraction must be based on valid search and seizure authorization. An individual subject to the UCMJ who does not consent to chemical testing, as described in § 634.37, may nonetheless be subjected to an involuntary extraction of bodily fluids, including blood and urine, only in accordance with the following procedures:

(1) An individual subject to the UCMJ who was driving a motor vehicle and suspected of being under the influence of an intoxicant may be subjected to a nonconsensual bodily fluid extraction to test for the presence of intoxicants only when there is a probable cause to believe that such an individual was driving or in control of a vehicle while under the influence of an intoxicant.
